

DIKSHA PATEL

Student (Electronics and Communication Engineering)

ABOUT ME

B.Tech student with experience in Python development and hands-on exposure to AI/ML concepts and embedded systems . Currently pursuing internships in Python development and actively building skills in programming, data analysis, and problem-solving . Passionate about technology, content creation, and continuous learning.

EDUCATION IILM UNIVERSITY [2025-2029]

Bachelor's Of Technology

Relevant Coursework:

- Python Programming
- Data Structures
- Artificial Intelligence Fundamentals
- Embedded systems
- Digital Electronics

SKILLS

Technical Skills

- Python
- C Programming
- SQL
- Git & GitHub
- Data Analysis
- Pandas
- Matplotlib
- HTML
- CSS
- JAVASCRIPT
- Embedded systems

WORK EXPERIENCE

PYTHON PROGRAMMING INTERN

VaultOfCodes

- Applied Python concepts to real-world projects.
- Worked with data handling and automation tasks.
- Enhanced coding efficiency through practical implementation.
- Collaborated on project-based learning activities.

CONTENT WRITING INTERN

InAmigoes Foundation

- Created engaging and informative content for digital platforms.
- Conducted topic research and content planning.
- Improved written communication and editing skills.
- Delivered content within deadlines while maintaining quality.

PROJECTS

RC Drone with Custom Flight Controller (Ongoing)

- Developing a custom flight controllerbased RC drone with a custom flight controller, integrating sensors, ESCs, brushless motors, and PID-based flight stabilization.

MPU6050 Motion Monitoring System

- Developed an Arduino-based motion monitoring system using the MPU6050 sensor to measure acceleration and angular rotation for real-time orientation tracking.

Secret Code Generator (Python)

- Developed a Python application to encode and decode messages using custom logic and string manipulation.
